

DevOps Engineer

About the company

We want to solve one of the biggest problems experienced by organizations today – information silos and the inability for companies to leverage their data. Your organization depends on the ability to quickly get information when needed. However, too often your organizations applications are disconnected information silos that hinder your employees in getting access to certain data and get the full picture. The CluedIn integration platform provides you with a comprehensive solution for connecting, enriching, and managing information across your applications and data repositories– whether these are cloud - based or on - premises. We provide you with a single platform that allows your employees to make smarter decisions and work faster.

Position Summary

We are seeking for a talented devops engineer who will report to our lead engineer. The person that fills this position will help us to grow our product while also participating in shaping a fully automated on-premise platform (from development to production).

As part of the product team, you will be responsible for maintaining, improving the CI/CD of a large data platform management system. You will be responsible for collaborating with other team members, delivering the structure to release quality software, and contributing to the overall scalability, maintainability and reliability of our platform.

The system consists in a large data management platform with plenty of interesting challenges to tackle such as large data ingestion, streaming platform, processing of billions of data points, updating large data set in automated fashion...

Stack

Experience working with a .NET, configuration management systems, C# is a big asset, Docker, CI/CD pipelines (Azure), maintaining large on-premise project, release management cycle, basic engineering skills, communication and interpersonal skills.

Benefits

- A job that works around your life (not the other way round)
- The opportunity to work with some of the most talented people in the world
- No need to commute
- No need to be tied to a desk
- Work on things you'll love
